

# RJS-TACT-D30-H

TACT SWITCH

On/off right angle tactile switch that is only on when the button is pressed or if there is a definitive change in pressure.

Used for circuit board, there are many different kinds of height for the switch knob, the standard height range is 4.3mm to 13mm.

|                      |                     |                             |                  |
|----------------------|---------------------|-----------------------------|------------------|
| Type:                | Snap-in             | Operating force:            | 0.98N            |
| Operating Direction: | Top Push            | Travel:                     | 0.25mm           |
| Operating Life:      | Over 100,000 cycles | Initial contact resistance: | 100mΩ max.       |
| Stem color:          | Black               | Operating Temperature:      | -40°C~+90°C      |
| Stem height:         | H=4.3-13mm          | Series type:                | right angle type |
| Rating (max.):       | 50mA 12V DC         | Rating (min.):              | 10μA 1V DC       |
| SPQ:                 | 1,000pcs            | OEM or ODM:                 | Available        |
